# SOUND AND SAFE

## A HISTORY OF LISTENING BEHIND THE WHEEL

KARIN BIJSTERVELD, EEFJE CLEOPHAS,  
STEFAN KREBS, AND GIJS MOM

248pages | Hardback  
978-0-19-992569-8  
£22.99/£18.40

"This **wonderfully researched and written book** charts the fascinating history of our relationship to the sound of automobiles. From the individual strategies and skills embodied in listening to the sound of our engines to the commercial practices that have standardized and marketed those sonic experiences. *Sound and Safe* is a major contribution to our understanding of the culture of the automobile."

—Michael Bull, author of *Sound Moves: iPod Culture and Urban Experience*

"Most music is listened to in cars. Karin Bijsterveld and her colleagues in this **fascinating well-researched book**, part of the new interdisciplinary field of sound studies, trace mainly in European contexts how cars have become auditory bubbles cocooned from their surroundings."

—Trevor Pinch, Cornell University

***Sound and Safe*** traces the full history of noise in and around cars, shows how we created auditory privacy in our cars, even though they were highly noisy things at the beginning of the twentieth century. It is about the sounds of car engines, tires, wipers, blinkers, warning signals, in-car audio systems and, ultimately, about how we became used to listen while driving.

**Karin Bijsterveld** is Professor of Technology and Society Studies, Maastricht University

**Eefje Cleophas** is Instructor, Department of Technology and Society Studies, Maastricht University

**Stefan Krebs** is Researcher, Eindhoven University of Technology

**Gijs Mom** is Associate Professor of the History of Technology and Mobility, Eindhoven University of Technology
